

CAREER TALKS - IV

A career talk on **Civil Aviation, Aerospace Industry and National Aero Tech Fest–2026** (NATF–2026) was organised for the **students of Class XI Science** of Welspun Vidya Mandir on 9th January 2026. The session was conducted by representatives from NDC Institute of Aircraft Maintenance Engineering (IAME) in association with Space Technology Students Society, IIT Kharagpur.

The speaker highlighted India's growing aviation and space sector, referring to national achievements such as Chandrayaan-3 and Aditya missions, and explained how initiatives like the UDAN Yojana are enhancing air travel accessibility. The objective of the talk was to create awareness and inspire students to explore careers in aviation, aerospace engineering, and space technology.

During the session, students were introduced to the National Aero Tech Fest–2026, its objectives, events, and participation details. Information about eligibility, competitions involving aviation models and drones, certification, and attractive prizes was shared. The speakers also guided students on career pathways in aviation science and the opportunities available after pursuing PCM at the 10+2 level.

The interaction was highly informative and motivating, encouraging students to think innovatively and consider future careers in the aviation and aerospace industry.
