

## EDUCATIONAL VISIT TO THE DENTIST

Educational visits help students to learn lessons that prove vital in their early years and wellbeing having positive effects not only in their present but in the future too.

With an aim to instil in the young minds the importance of Oral Hygiene and to promote the importance of good oral habits, the students of Class IV were sent to Smile Dental Clinic, Adipur for an educational visit.

The visit was initiated with a talk by Dr. Vikas Bhambhani on oral hygiene and demonstrations were given about good tooth brushing techniques. He also gave lessons on sugar in food and healthy diets and simple day to day oral health routines. The students were educated about common dental ailments especially stressing on decay and gum diseases and measures to prevent them.

WVM thanks Dr. Vikas Bhambhani for conducting such an informative and educational session for the students.

A Report from W.V.M.
