

# Pre-Primary Competiton

Learning to speak in public, builds communication skills and confidence, and enables children in developing self-confidence. To strengthen verbal skills and foster public speaking competency of the young minds, the Pre Primary wing had organized Speech related competitions for the little ones. The students of Play House had “Recitation”, the LKG students had “Object Talk” and the UKG students had “Picture Talk”.

Many students had participated enthusiastically. It was an interactive activity that helped in building social, emotional and language skills of the children. Children had made use of props to support their narration. The activities gave the children a thrilling experience of sharing their feelings and thoughts with their fellow classmates and teachers. The aim of the activity was to engage students through activity based learning and thereby bring about a holistic development in the students.
